Summary

Computer Engineering undergraduate with strong foundations in data structures, algorithms, DBMS, and backend development. Experienced in building full-stack web applications using Python, Django, Flask, SQL, and REST APIs. Seeking a software engineering internship to apply problem-solving and scalable application development skills.

Education

Bachelor of Engineering – Computer Engineering	2023 – Present
K.C. College of Engineering	CGPA: 9.63 / 10
Higher Secondary Certificate (HSC – Science)	2023
St. Mary High School	75%
Secondary School Certificate (SSC)	2021
New Indian High School	91.20%

Technical Skills

Languages: Python, SQL

Machine Learning: Supervised Learning, Classification, Regression, Random Forest, Decision Trees

Libraries & Frameworks: scikit-learn, pandas, NumPy, Flask

Tools: Power BI, Excel, Git

Concepts: Data Structures and Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, API Design

Projects

Planora – Event Orchestration Platform (Ongoing) GitHub

Django REST, React, SQLite/PostgreSQL, WebSockets, JWT, Groq API, Ollama

- Built a full-stack event management platform with authentication, dashboards, task tracking, budgeting, chat, and notifications.
- Developed REST APIs using Django REST Framework with JWT authentication, role-based access control, and pagination.
- Implemented real-time chat and task updates using Django Channels and WebSockets.
- Integrated AI features using Groq API and Ollama for event summaries, task suggestions, and communication drafts.

Heart Disease Prediction System GitHub

Machine Learning — Python, Flask, scikit-learn

- Built an end-to-end ML web application to predict heart disease risk from clinical patient data.
- Developed a Flask backend to serve real-time predictions using a trained Random Forest classifier.
- Trained and optimized the model on a Framingham dataset with 3,646 records and 15 features, using preprocessing, feature scaling, and SMOTE for class imbalance.
- Deployed an interactive Flask web interface with health-risk input forms, BMI calculation, and High Risk / Low Risk classification.

FITNESS FUSION – Health & Wellbeing Platform GitHub

Web Development — PHP, HTML, CSS, JavaScript

- Developed a responsive health platform for fitness tracking and wellness guidance.
- Implemented interactive self-assessment tools and ensured user-friendly UI.
- Designed user-friendly UI ensuring smooth navigation across devices.

Experience

EDA Intern Dec 2025 – Jan 2026

Imarticus Learning

- Performed exploratory data analysis using Python, SQL, and Power BI on real-world datasets.
- Applied data cleaning, transformation, and visualization techniques to derive actionable insights.
- Built dashboards to visualize trends and support data-driven decision-making.

Certifications

- **IBM Generative AI Engineering Professional Certificate** — Coursera (**Ongoing**)
- **AWS Academy Machine Learning Foundations** — Amazon Web Services (**Jun 2025**)
- **Python Data Structures & Algorithms** — Udemy (**Sep 2024**)
